LA PRAIRIE

The newest La Prairie fragrance, Life Threads.

NECK TIGHT

RELASTIN

Using a combination of vitamins, peptides and zinc, the new Relastin Ultra Emollient aims to increase skin elasticity, smooth skin and reduce sagging and wrinkles. Although specifically focused for improvement in and around the neck area, the cream can also be used on the face and the makers report results can be seen within two to four weeks of use.

KENNETH MARK MD

Kenneth Mark MD's latest antioxidant hydrating cream contains astaxanthin, a naturally occurring carotenoid said to have many skin-improving benefits such as helping to eliminate free radicals and reducing wrinkles.

Scientific research also indicates that astaxanthin can be 1000 times more potent than other age-fighting antioxidants, which is good news for those looking to improve their skin. The cream should be applied daily and nightly around the face and neck and can be worn under sunscreen and makeup. www.kennethmarkmd.com
