BUSINESS BRIEFS

Doctor Introduces Skin Care Line

Southampton and East Hampton dermatologist and Mohs skin care surgeon Dr. Kenneth Mark has recently released his own line of skin care products, Kenneth Mark Skin Care, Inc.

His new line includes "Antioxidant Toning Cleanser" with lipoic acid and soy protein to protect from UV rays and a lightweight "Hydrating Moisturizer" with hyaluronic acid to eliminate wrinkles and protect from UV damage. An "Anti-aging Mask" with lipoic acid, and enhanced with green tea, is said to soothe sunburns and irritation while exfoliating and hydrating for skin restoration. Also, there is an "Antioxidant Hydrating Cream" with astaxanthin to reduce melanin production and give the skin an even complexion and a "Tighten and Lighten Eye Cream" with peptides to relieve the appearance of dark circles and lines and increase firmness and elasticity while protecting eyes from future damage.

All Kenneth Mark Skin Care products are available at his Southampton office, located 365 County Road 39A, Suite 14; his East Hampton office, at 200 Pantigo Place, Suite N; and at White's Pharmacy in East Hampton.

In addition to his two local practices, Dr. Mark has a practice in Manhattan and in Aspen, Colorado and is proficient in all skin care services from moles and SPF use, to cosmetic procedures and hair removal.
